Title: Measuring Perceptions of Appropriate Prison Sentences in the United States, 2000

ICPSR Study Number: 3988

Funding Agency: United States Department of Justice. National Institute of Justice

Grant Number: 99-CE-VX-0001

Summary: This study examined the public's preferences regarding sentencing and parole of criminal offenders. It also investigated the public's willingness to pay for particular crime prevention and control strategies and tested new methods for gathering this kind of information from the public. This involved asking the public to respond to a series of crime vignettes that involved constrained choice. The study consisted of a telephone survey of 1,300 adult respondents conducted in 2000 in the United States. Following a review by a panel of experts and extensive pretesting, the final instrument was programmed for computer-assisted telephone interviews (CATI). The questionnaire specifically focused on: (1) the attitudes of the public on issues such as the number of police on the street, civil rights of minority groups, and the legal rights of people accused of serious crimes, (2) the randomized evaluation of preferred sentencing alternatives for eight different crime scenarios, (3) making parole decisions in a constrained choice setting by assuming that there is only enough space for one of two offenders, (4) the underlying factors that motivate the public's parole decisions, and (5) respondents' willingness to pay for various crime prevention strategies.

Universe: Adults 18 and over living in the United States.

Data Source: Data were obtained through computer-assisted telephone interviews.

Sample: A random-digit dial (RDD) sample, Type B, of 4,966 phone numbers in the United States, including Alaska and Hawaii, was obtained from Survey Sampling, Inc. The sample was produced by selecting randomly generated telephone numbers in proportion to the number of listed telephone numbers in each working telephone block. A block is a contiguous set of 100 telephone numbers within an active telephone area code and exchange combination, such as 555-555-3300 to 555-555-3399. This type of sample yields high efficiency, with the chance of selecting working numbers ranging between 55 percent and 75 percent, in contrast to the 24-percent chance of selecting a working number with a pure random-digit sample. Although a potential for bias could exist with the Random Digit B sample, no actual bias has been encountered. In an effort to select a representative sample of adults within each household, the last birthday method of screening was used. Upon contacting a potential respondent, interviewers asked to speak with the adult in the household over 18 who had had the most recent birthday. If the selected person was not available, the

interviewer arranged a callback, for a specific date and time if possible, to speak with the eligible person. Once an eligible respondent had been identified in a specific household, there could never be a substitution.

Date of Collection: May 16, 2000-August 8, 2000

Response Rates: Out of the random-digit dial sample of 4,966 phone numbers, a total of 1,300 interviews were completed, a 43 percent response rate.

Presence of Common Scales: None.

Unit of Observation: Individuals

Geographic Unit: state

Data Collection Notes: The user guide, codebook, and data collection instrument are provided by ICPSR as separate Portable Document Format (PDF) files. The PDF file format was developed by Adobe Systems Incorporated and can be accessed using PDF reader software, such as the Adobe Acrobat Reader. Information on how to obtain a copy of the Acrobat Reader is provided on the ICPSR Web site.

Extent of Collection: 8 data files + machine-readable documentation (PDF) + SAS data definition statements + SPSS data definition statements

Extent of Processing: ICPSR produced a codebook, generated SAS and SPSS data definition statements, and reformatted the data and documentation.

Data Format: Logical Record Length with SAS and SPSS data definition statements

ICPSR CODEBOOK NOTES

1. In accordance with instructions from the National Institute of Justice data collections funded with money from the Violent Offender Incarceration and Truth-in-Sentencing Incentive Grants were minimally processed by ICPSR. This means that ICPSR did not label undocumented codes or standardize missing data. The data are essentially released in the same condition in which they were received from the principal investigator.
2. In Part 8, Verbatim Responses, ICPSR recoded some values to protect respondent confidentiality. For example, names of people and cities were replaced with [name] and [city].
3. The codebooks that were supplied by the principal investigator, located in Appendix B, contain extensive documentation for this dataset, including variable descriptions and value labels for every variable.

PART 1: IMPRISONMENT DECISIONS

The next series of questions concerns convicted offenders who have spent time in prison. We want to know if they have served long enough and should be let out. When they are let out of prison, offenders normally spend time under supervision. If you need me to repeat any portion of any of the questions, please ask me. We value your opinion and hope you will be able to answer these questions.

CATI: RANDOMLY ASSIGN EACH RESPONDENT TO EITHER Q1 OR Q2. ASK EACH QUESTION THREE TIMES — THREE SETS OF TWO SCENARIOS.

Please consider the following offender and think about whether he has served long enough.

Q1c. I realize you would prefer to keep them both in prison longer. However, now I want you to consider that the state only has bed space for one of the two offenders and one must be let out. Which prisoner should be let out? If you need me to repeat any of the details of their crimes, I will be happy to do so.

- 1 OFFENDER ONE, WHO WAS CONVICTED OF _____

CATI: GO TO NEXT SET OF SCENARIOS OR PART TWO

Please consider the following offender and think about whether he has served long enough. To keep this offender in prison another year will cost the government \$25,000. It would cost the average household \$25 next year to keep offenders of this type of crime in prison for one more year.

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

Now, please consider a second offender and think about whether he has served long enough. Remember, that to keep this offender in prison another year will cost the government \$25,000 and it would cost the average household \$25 next year to keep offenders of this type of crime in prison for one more year.

CATI: PRESENT SCENARIO FROM LIST OF MAIN SCENARIOS – OFFENDER TWO

Q2b. With this in mind would you let this offender out of prison after serving [INSERT YEARS] years?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

CATI:

IF Q2A OR Q2B IS “YES” (1) GO TO NEXT SET OF SCENARIOS OR PART TWO

IF Q2A AND Q2B ARE “NO” (2) ASK Q2C

OTHERWISE ASK Q2D

Q2c. I realize you would prefer to keep them both in prison longer. However, now I want you to consider that the state only has bed space for one of the two offenders and one must be let out. Which prisoner should be let out? If you need me to repeat any of the details of their crimes, I will be happy to do so.

- 1 OFFENDER ONE, WHO WAS CONVICTED OF _____
- 2 OFFENDER TWO, WHO WAS CONVICTED OF _____
- 3 BOTH
- 7 DON'T KNOW
- 8 NEITHER (REFUSED)

Q2d. Please consider that the state only has bed space for one of the two offenders and one must be let out. Which prisoner should be let out? If you need me to repeat any of the details of their crimes, I will be happy to do so.

- 1 OFFENDER ONE, WHO WAS CONVICTED OF _____
- 2 OFFENDER TWO, WHO WAS CONVICTED OF _____
- 3 BOTH
- 7 DON'T KNOW
- 8 NEITHER (REFUSED)

CATI: GO TO NEXT SET OF SCENARIOS OR PART TWO

PART 2: CRIMINAL RESPONSE DECISIONS

CATI: ASK Q3 THROUGH Q6 FOR EACH OF TWO SCENARIOS

CATI: IF AMOUNT IS < AMOUNT GIVEN IN Q5, REMIND RESPONDENT THAT THIS AMOUNT SHOULD BE EQUAL TO OR GREATER THAN THE AMOUNT THEY PREFERRED WHEN THE OFFENDER COULD PAY THE FINE/RESTITUTION.

CATI ASK Q6a AND Q6b IF Q4 IS “FINE OR RESTITUTION” (3) ONLY:

PART 3: CRIME PREVENTION DECISIONS

CATI: INSERT EITHER \$100/\$1000 FOR PART 3

For the next few questions, I want you to put yourself in the shoes of your local mayor. The Federal government has given your city [\$100, \$1,000] per household. You may spend all or part of that money on crime control or crime prevention, or you may give all or part of it back to your local residents.

Four different crime control strategies have been recommended to you: one - add more prisons, two - add more drug and alcohol treatment programs for offenders convicted of nonviolent crimes, three - add more police on the street, and four - add more prevention programs to help keep youth out of trouble.

Once again, you have [\$100/\$1,000] per household to allocate to these programs or to rebate to local residents.

CATI: ROTATE Q7 THROUGH Q10. KEEP THE SAME ORDER FOR THE FOLLOW UP QUESTIONS.

Q7. Would you spend any of this money to add more prisons?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

Q8. Would you spend any of this money to add drug and alcohol treatment programs for offenders convicted of nonviolent crimes?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

Q9. Would you spend any of this money to add more police on the street?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

Q10. Would you spend any of this money to add more prevention programs to help keep youth out of trouble?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

Q11. Would you give any of this money to taxpayers in your city?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

CATI: IF MORE THAN ONE STRATEGY IS "YES" CONTINUE, OTHERWISE GO TO PART 4.

Now thinking about the strategies that you have approved, I would like you to think about how much of the [\$100/\$1000] you would spend on each program. The strategies you approved of were:

[IF Q7 IS YES DISPLAY: "Add more prisons"]

[IF Q8 IS YES DISPLAY: "Add more drug and alcohol treatment programs for offenders convicted of nonviolent crimes"]

[IF Q9 IS YES DISPLAY: "Add more police on the street"]

[IF Q10 IS YES DISPLAY: "Add more prevention programs to help keep youth out of trouble"]

[IF Q11 IS YES DISPLAY: "Give money to taxpayers in your city"]

You can give me \$ numbers or percentages.

- 1 CONTINUE
- 2 ALLOCATE MONEY EVENLY – GO TO INSTRUCTIONS BEFORE Q17
- 7 DON'T KNOW – GO TO INSTRUCTIONS BEFORE Q17

Would you prefer to give your answers in numbers or percents?

- 1 NUMBERS
- 2 PERCENTAGES

CATI: BEFORE EACH OF Q12 THROUGH Q15, PRESENT THE STATEMENT, “OK, that leaves \$_____/_____%.” IF IT IS THE LAST OPTION PRESENTED, PRESENT THE QUESTION AS FOLLOWS. “Would you then give the remaining \$_____/_____% to [INSERT STRATEGY]?”

12. How much would you give to add more prisons?

_____ DOLLARS
_____ PERCENT

13. How much would you give to add more drug and alcohol treatment programs for nonviolent offenders?

_____ DOLLARS
_____ PERCENT

14. How much would you give to add more police on the street?

_____ DOLLARS
_____ PERCENT

15. How much would you give to add more prevention programs to help keep youth out of trouble?

_____ DOLLARS
_____ PERCENT

16a. Would you then give the remaining \$_____/_____% to local residents?

- 1 YES
- 2 NO
- 7 DON'T KNOW
- 8 REFUSED

CATI: IF Q16a OR QUESTION FOR LAST STRATEGY IS IS “NO” (2) DON’T KNOW” (7), OR “REFUSED” (8), ASK Q16b, OTHERWISE, GO TO INSTRUCTIONS BEFORE Q17

16b. Where would you like me to allocate the remaining \$____/____%?

ADD MORE PRISONS

\$_____/____%

ADD MORE DRUG AND ALCOHOL TREATMENT PROGRAMS FOR OFFENDERS
CONVICTED OF NONVIOLENT CRIME

\$_____/____%

ADD MORE POLICE ON THE STREET

\$_____/____%

ADD MORE PREVENTION PROGRAMS TO HELP KEEP YOUTH OUT OF TROUBLE

\$_____/____%

GIVE TO LOCAL RESIDENTS

\$_____/____%

PART 4: HOW MUCH WOULD YOU BE WILLING TO PAY?

CATI: ASK ONLT THREE OF Q17 THROUGH Q21 AND ROTATE THE ORDER. FOR MONETARY VALUES, USE ONLY \$25 THROUGH \$225 FOR RANDOMIZATION. FOR INCREASE THE MONETARY INCREMENT BY ONE FOR Q17a, Q18a, Q19a, Q20a, AND Q21a. DECREASE THE MONETARY INCREMENT BY ONE FOR Q17b, Q18b, Q19b, Q20b, AND Q21b. USE \$10 TO DECREASE FROM \$25 AND \$250 TO INCREASE FROM \$225.

Now I want to ask you how much of your own money you would be willing to pay to reduce certain crimes. In each case, I am going to ask you to vote “yes” or “no” to a proposal that would require your household and each household in your community to pay money to prevent crime in your community.

Remember that any money you agree to spend on crime prevention is your money that could otherwise be used for your own food, clothing, or whatever you need. Unlike the previous question, where the government was planning to give you money back, now I want you to think about actually taking more money out of your pocket.

for your own food, clothing, or whatever you need.
Unlike the previous question, where the government was
planning to give you money back, now I want you to
think about actually taking more money out of your
pocket.

- 3) Donate to other charities & causes already
- 4) Only catching 1 in 10/odds not good enough/wouldn't make much of a difference
- 5) That's too much money/a little less would be more reasonable/\$100 is enough, I wouldn't pay more than that

- 7) We don't have that problem in our community/it's not needed
- 8) I'm not (or my family is not) at risk for that crime.

- 10) Doubt that the program will really work or that money will be spent wisely/handled properly
- 11) This is something people can prevent themselves/security systems can prevent burglary/women should dress more conservatively
- 12) I'd rather spend the money on other programs
- 13) No, but I would be willing to pay \$xxxx.

Positive:

- 23) That could be me or my kids or someone I know/it will make me feel safer/sleep at night/peace of mind/ know or have been victims of that crime/ key words = self/family/safety/me/mine
- 24) Everybody should do their part/want to help others in my community/if you have it you should pay/key words = community / neighborhood /everyone/civic duty
- 25) It's not too much money to pay/I can afford that
- 26) General statement like "helps keep crime down"/"if it works it is worth it" / if it's successful

Neutral:

Four different crime control strategies have been recommended to you: one - add more prisons, two - add more drug and alcohol treatment programs for offenders convicted of nonviolent crimes, three - add more police on the street, and four - add more prevention programs to help keep youth out of trouble.

planning to give you money back, now I want you to
think about actually taking more money out of your
pocket.
